You're invited to ...
"WE ARE ALL PEOPLE OF POWER!"

Drop in to Exmouth Library in February for a month of free energy-related events designed to help you save money, stay warm and be more carbon friendly.

FREE EXHIBITION

From February 2nd to 26th Exmouth Library will host **"We Are All People Of Power"** - framed portraits that celebrate the local and human stories behind our energy transition.

Artist **Polly Meyrick's** sensitive artwork highlights how renewable energy creates new opportunities, strengthening communities, bringing new jobs, funding for local projects, and support for people struggling with energy costs. Don't miss it!

LOCAL CASE STUDIES

Throughout February, full details and reports of the **retrofit audits** completed for four Exmouth archetype houses will be available to view in Exmouth Library. Is your home similar?

There will be **information** about funding & grants, renewable energy, green tariffs, community energy ... and much more. Additionally, you can contact **ECOE Advice** for advice and support retrofit@ecoeadvice.org.uk
Look out for us in the library!

FREE EVENT

On February 26th at 6pm Exmouth Library will host a free screening of "We Are All People Of Power" **a short film**, revealing the people (and the artist!) behind the eight portraits.

We'll hear from energy experts and also **Exmouth residents** who have already made energy-saving changes to their homes. Find out how much they spent ... and how much they are saving. Join us and become more energy-aware and efficient!

If you're worried about your energy/water bills, damp and mould, or simply need support to make your home more comfortable or more carbon friendly, please contact ECOE Advice.
